

- Voltage gated Potassium channels
- Influenza Infection
- regulation of secretion by cell
- action potential
- regulation of amide metabolic process
- positive regulation of protein targeting to membrane
- positive regulation of apoptotic process
- HALLMARK INFLAMMATORY RESPONSE
- positive regulation of regulated secretory pathway
- Heparan sulfate/heparin (HS-GAG) metabolism
- Degradation of the extracellular matrix
- Efferocytosis
- negative regulation of intracellular signal transduction
- behavior
- response to light stimulus
- brain development
- negative regulation of cell differentiation
- negative regulation of phosphate metabolic process
- Transport of inorganic cations/anions and amino acid
- phospholipid biosynthetic process
